## customised built-in seating

Fitted seating can substantially improve the appearance of some design schemes and is an attractive method of softening up open areas and making them more customer friendly.

At Abbey we discuss your seating requirements in full and either working in conjunction with your designer, architect or yourself, provide the best working solution for your particular style of operation.

An impressive range of Leather, Faux Leather and contract fabrics to Crib 5 standards are available for you to select from.

Abbey will design, manufacture and install to your required date with the minimum of disruption to your business.

For more information please contact our sales office.
